

Your career is on track.

# Software Architect / Senior Developer (m/f/d)

We detect and track trains in real-time and know exactly what is happening along the rail. For this, we use state-of-the-art technology and unique solutions for the global railway industry. Are you ready to shape the future with us?

## **Your main roles and responsibilities**

- Be part of an agile development team and drive developments through your own initiative
- Design scalable and robust architectures and help to implement them
- Be a coach for developers and support them in questions and concrete implementations
- Create opportunities for knowledge transfer within the team
- Bring in your expertise in coding and contribute to optimization through code reviews

## **You are just right for this role if**

- you are fascinated by software development and already have several years of experience in this field
- Go, Python, Kotlin or Java are part of your applied repertoire
- JavaScript, TypeScript and frameworks like Angular or Vue.js are not new to you
- you have experience with CI/CD automation
- you have team spirit and enjoy learning new technologies

## **We offer**

- a secure job in an international environment
- an agile and open corporate culture
- the opportunities for personal development and further training
- attractive social benefits such as free lunch, fruit and coffee, free childcare, numerous sports offer, company events and much more
